

Brush Disposal Information

The disposal of trees and brush by commercial businesses / haulers that provide service is prohibited. This does not include the commercial business if they are providing their services to the County, Township or Municipality. The County, Township or Municipality must contact, and get approval from, the landfill prior to any disposal of trees and brush, even when tree and brush disposal services are provided by a commercial business.

The maximum diameter of trees accepted shall be approximately 15 inches. Root balls, soil, and previously burned material are prohibited from disposal at the brush site. Please call the landfill for disposal options for these materials.
